She is very helpful in nature. She is a kind and nice person to talk to. She analyses the situation very well and puts a lot of effort.

Know yourself. The best defense against the insults and projections of the narcissist is a strong sense of self. When you know your own strengths and weaknesses, it's easier to reject any unfair criticisms leveled against you. Spend time with people who give you an honest reflection of who you are. In order to maintain perspective and avoid buying into the narcissist's distortions, it's important to spend time with people who know you as you really are and validate your thoughts and feelings.

Make new friendships, if necessary, outside the narcissist's orbit. Some narcissists isolate the people in their lives in order to better control them. If this is your situation, you'll need to invest time into rebuilding trusted friendships or cultivating new relationships.
